## EDUCATION

### University of Washington

09/2025-06/2027(Expected)  
Master of Science in  
Technology Innovation

### Shanghai Jiao Tong University

09/2021-06/2025  
Bachelor of Design

### The University of Sydney

07/2024-11/2024  
Exchange student program

### Korea University

06/2024-07/2024  
Exchange student program

## DESIGN SKILLS

End-to-End Product Design  
Interactive Prototyping  
Wireframing  
Visual Design  
Usability Studies

## TOOLKIT

Figma/Adobe Suite/Principle  
Cinema4D/Unity  
Arduino/Python/HTML/CSS

## HONORS

Excellent Visual Design Team,  
2024 Undergraduate  
Graduation Thesis, School of  
Design

## WORK EXPERIENCE

### UI&UX Intern BYBIT

11/2023-06/2024

Shanghai, China

- Designed the complete user experience for fiat deposit, withdrawal, and one-click buy processes, improving user satisfaction.
- Prototyped user interfaces for BYBIT's trading platform, optimizing deposit and buy experiences for better user flow.
- Collaborated with the UX research team on user testing, gathering feedback to improve usability. Collaborated with front-end developers for high-fidelity design implementation.
- Developed visual systems and more than 5 design components with the entire UED and developing team.

## SELECTED PROJECTS

### VR Meeting App Designed for ASD

02/2024-05/2024

- Designed a VR meeting interface focused on improving communication between individuals with Autism Spectrum Disorder (ASD) and neurotypical individuals. Incorporated emotion translation and implied meaning features to enhance understanding
- Conducted surveys with 10 ASD participants and offline EEG tests and heart rate measurements to refine the interface based on responses.
- Gathered feedback to iteratively enhance usability and effectiveness.

### Reset & Restart

08/2023-09/2023

- Designed the 'Reset & Restart' program to help ex-prisoners overcome reintegration challenges, providing a toolkit and an online platform offering material and psychological support.
- Designed the entire toolkit's product, packaging, and branding.

### Concert Carriage

03/2023-04/2023

- Designed a musical carriage offering a concert-like experience for passengers.
- Built and demoed hardware prototype based on Arduino set.

### Easy Diet Project

07/2022-09/2022

- Conducted interdisciplinary research on psychology, behavioral studies, eating disorder, and other theories.
- Conducted and independent interview with doctors from public hospital.
- Designed a service to assist eating disorder patients in their recovery, aiming to raise awareness of this sensitive issue.
